

Line Drain Layout

Notes

- A chamber in a gap of 35' feet is advised for easy cleaning. Therefore, we need 5 chambers. (You may share your suggestions if you think otherwise).
- Green colored chamber and Pipe connecting the main drain will be shared by 3 (JB Mishra / Bibhu, Nayak/Rajesh Babu, and Padhi Babu).
- Blue colored chambers and pipes will be shared by 2 (Nayak/Rajesh Babu, and JB Mishra / Bibhu).
- In addition to this cost, every individual shall give their contribution to main drain (you need to connect with Sangram Babu separately on that).
- Anyone joins the line drain in the future shall share the cost of the line drain, and main drain. Main drain share shall go to Sangram Babu. Line drain share shall go to Bibhu, Rajesh Babu, and Padhi Babu.
- Every Individual shall have their own personal chamber in their house connectivity the chamber on the road. They should bear their own cost for that.
